

What Is Courage?

Long are those of battle scars and broken hearts, for those are wanted for their courage and strength to carry on for the young and weak, to know that life is worth living. That you cannot give up, for they fought for this right for you, and for others, but not for honor, but for mankind.

So like the rising sun and the setting moon, they will always exist, so you can be free to think for yourself and act with intelligence and honor to pass on to the human race of the world and will become heroes and martyrs, for the future leaders of the world to come.

May you and future generations have the faith to make the right decisions.

Warrior Inside!
